

Sorting

Chapter 7

Heap Sort

- Make use of $\log(n)$ insertion and deletion in min-heaps
- Insert all elements into a min-heap
- Remove all elements from the min-heap

Initialize H as a MinHeap

For $i = 1$ to n

 Insert $A(i)$ into H

$$T(n) = O(n \log n)$$

For $i = 1$ to n

$A[i] = \text{DeleteMin}$ from H

Heap Sort Example

A=

8	10	5	1	3	20	13	7	2	12
---	----	---	---	---	----	----	---	---	----

H=

--	--	--	--	--	--	--	--	--	--

Heap Sort Example

Phase II: Deleting from the Heap

In-place Heap Sort

- › Reuse the same array A as a Heap

```
For i = 2 to n
  Insert A[i] into the MaxHeap A[1..i-1]
For i = n downto 1
  A[i] = DeleteMax from Heap A[1..i]
```

In-place Heap Sort Example

A=

8	10	5	1	3	20	13	7	2	12
---	----	---	---	---	----	----	---	---	----

Merge-sort

- › Split the array into two subarrays
- › Sort each subarray
- › Merge the two sorted arrays

```
Sort(A, start, end)
  return if start ≥ end
  m = ⌊n/2⌋
  Sort(A, start, m)
  Sort(A, m+1, end)
  Merge(A, start, m+1, end)
```

```
Sort(A, n)
Sort(A, 1, n)
```

Merging Example

8	10	5	1	3	20	13	7	2	12
---	----	---	---	---	----	----	---	---	----

8	10	5	1	3
---	----	---	---	---

Sort

1	3	5	8	10
---	---	---	---	----

20	13	7	2	12
----	----	---	---	----

Sort

2	7	12	13	20
---	---	----	----	----

Merge

8	10	5	1	3	20	13	7	2	12
---	----	---	---	---	----	----	---	---	----

8	10	5	1	3
---	----	---	---	---

Sort

1	3	5	8	10
---	---	---	---	----

20	13	7	2	12
----	----	---	---	----

Sort

2	7	12	13	20
---	---	----	----	----

Merge

1	2	3	5	7	8				
---	---	---	---	---	---	--	--	--	--

Merging Example

8	10	5	1	3	20	13	7	2	12
---	----	---	---	---	----	----	---	---	----

8	10	5	1	3
---	----	---	---	---

Sort

1	3	5	8	10
---	---	---	---	----

20	13	7	2	12
----	----	---	---	----

Sort

2	7	12	13	20
---	---	----	----	----

Merge

1	2	3	5	7	8	10			
---	---	---	---	---	---	----	--	--	--

Merging Example

8	10	5	1	3	20	13	7	2	12
---	----	---	---	---	----	----	---	---	----

8	10	5	1	3
---	----	---	---	---

Sort

1	3	5	8	10
---	---	---	---	----

20	13	7	2	12
----	----	---	---	----

Sort

2	7	12	13	20
---	---	----	----	----

Merge

1	2	3	5	7	8	10	12	13	20
---	---	---	---	---	---	----	----	----	----

Merge

```
Merge(A, start, m, end)
  B = new array of size end - start + 1
  i = start
  j = m+1
  k = 1
  while i ≤ m AND j ≤ end
    if A[i] < A[j]
      B[k++] = A[i++]
    else
      B[k++] = A[j++]
  while i ≤ m
    B[k++] = A[i++]
  while j ≤ end
    B[k++] = A[j++]
  Copy B back into A[start..end]
```

---	---	---	---	---	---	----	----	----	----

Iterative Merge Sort

- We can remove the recursion using stacks (Straight-forward)
- We can also eliminate the stack using a bottom-up approach
