

# CS 12 - Assignment 1

## Printf and Turnin

### Due Wednesday, April 15

In this assignment you will be verifying that you know how to turn in an assignment properly and can use printf. Be sure to include all necessary information at the top of your program and use good commenting and style throughout.

Write a program that prints out your name, login, section number, and SSN. Yes, actually have it print YOUR info, not made up stuff or user defined stuff, so that I can form my roster. Just to make it a little more fun, use printf.
