

# CS 206 Testing and Verification Techniques in Software Engineering

## Winter 2009

### Homework 3

Hardcopy due at the beginning of class, Monday, February 16, 2009. The use of L<sup>A</sup>T<sub>E</sub>X is required.

1. (100pts)

Select a paper listed in the bibliography section of Chapter 2, 3, or 4 of Mathur's textbook. The paper should be a research paper of general interest to the class. Write a 1500-word (more or less) summary of the paper. Later on, you will have to present this paper in class.

To avoid duplicates, you **must** email me your paper choice before you begin working on it, and I will tell you if I approve it (I use a first-come-first-serve policy, so the sooner you choose your paper, the more likely your choice is to be approved).
