

Final Oral Presentation

Due December 9, 2005

Your group must give one 20-minute oral presentation on your project. The presentation should describe the project, some of the interesting details surrounding its creation, and demonstrate some results. A 5-minute question period will follow the talk. The talks will be scheduled during finals week at a time to be announced near the end of November.

Every member of the group must give some (non-trivial) portion of the presentation. Grading will be based on the content of the talk and the manner in which it is delivered.
