relaxedlzw.exe	Parameters	Description
	@para1	input, the original gif file
	@para2	output, the message-embeding gif file
	@para3	input, the message file
	@para4	input,an integer parameter that specifies the $length\_bits$ parameter of our algorithm
	@para5	input, an integer parameter that specifies the $interval\_bits$ parameter of our algorithm
	@para6	output, a file that contains the message that has actually been embeded into the message-embedding gif file
messagedecoder.exe	Parameters	Description
	@para1	input, the message embedding gif file
	@para2	output, the corresponding gif file without the message
	@para3	output, the messages that has been embeded in the input gif file
	@para4	input,an integer parameter that specifies the $length\_bits$ parameter being used in encoding
	@para5	input, an integer parameter that specifies the $interval\_bits$ parameter being used in encoding

examples:

relaxedlzw.exe airplane.gif airplane.nongreedy.gif random.txt 1 5 airplane.gif.message

messagedecoder.exe airplane.nongreedy.gif airplane.greedy.gif airplane.gif.message.back 1 5
