

CS 230, Quiz 2

Solutions

There is one question. No books, notes, or other aids are permitted.

Problem 1 (5 points)

Below is a simple 2D raytracing setup. The 1D image has three pixels. The blue object is made of glass. The red object is reflective. The green object is made of wood. The two yellow circles are point lights. Draw all of the rays that would be cast while raytracing this scene.
