## CS 230, Quiz 2

## Solutions

You will have 5 minutes to complete this quiz. There is one question. No books, notes, or other aids are permitted.

## Problem 1

Below is a simple 2D raytracing setup. The 1D image has three pixels. The blue object is made of glass (reflective and transparent). The green object is reflective. The red object is made of wood. The two yellow circles are point lights. Draw all of the rays that would be cast while raytracing this scene.
